

PRESS RELEASE

Zwolle – 10 August 2016

RoodMicrotec secures two new orders with Chinese and European market leaders in automotive and aerospace

RoodMicrotec has reinforced its position in the semiconductor market by securing orders with two suppliers for the automotive and aerospace industries. The clients, two of the largest companies in their sectors worldwide, are based in Europe and China.

RoodMicrotec is the European supplier of services for semiconductors and advanced microchips for the fast-growing markets of electric cars, industrial and medical supplies and 'The Internet of Things'.

RoodMicrotec will support its new customers, who supply finished products in the semiconductor market, in failure analysis and visual inspections of microchips. Failure analysis is part of a continuous improvement process to identify and correct defects and so maintain microchip operational reliability.

RoodMicrotec will focus on the following services:

1. The improvement of the packaged microchips through a selection process (exposure to extreme test temperatures and other environmental conditions) as required by the automotive and aerospace sectors.
2. The manufacturing of chip components for the electronic automotive sector, including image sensors utilised in cameras, optical mice and other optical sensors.

Both orders are an endorsement of RoodMicrotec's status as a leading provider of these services for the European and global markets, and are expected to lead to further significant business in the near-term.

The new contracts will commence in Q3 of this year and require RoodMicrotec and its customers to cooperate closely on a daily basis.

Reinhard Pusch, RoodMicrotec COO: "We are delighted to have received this business, on the basis of our know-how and competitiveness, from two companies that are market leaders in their fields. We are confident that the orders underway will form the basis of evolving partnerships going forward, for both these and other RoodMicrotec services like semiconductor turnkey management."

About RoodMicrotec

With more than 45 years' experience as an independent value-added service provider in the area of micro and optoelectronics, RoodMicrotec offers Fabless Companies, OEMs and other companies a one-stop shop proposition. With its *powerful solutions* RoodMicrotec has built up a strong position in Europe.

Our services comply with the industrial and quality requirements of the high reliability/space, automotive, telecommunications, medical, industrial and electronics sectors.

Certified by RoodMicrotec concerns inter alia certification of products to the stringent ISO/TS 16949 standard that applies to suppliers to the automotive industry. The company also has an accredited laboratory for test activities and qualification to the ISO/IEC 17025 standard.

Its value-added services include (eXtended) supply chain management and total manufacturing solutions with partners, failure & technology analysis, qualification & burn-in, test & product engineering, production test (including device programming and end-of-line service), ESD/ESDFOS assessment & training and quality & reliability consulting.

RoodMicrotec has branches in Germany (Dresden, Nördlingen, Stuttgart), United Kingdom (Bath) and the Netherlands (Zwolle).
